Subject: Reconstructed FBI File MP 175-112, Serial 32

To: The File

This memorandum briefly summarizes the status of missing original Federal Bureau of Investigation (FBI) case files or portions of case files in the President John F. Kennedy Assassination Records Collection (JFK Collection) and documents the National Archives and Records Administration's (NARA) efforts to reconstruct these records, where possible, from duplicate copies of documents located in other FBI files.

As the JFK Collection was first compiled and reviewed in the 1990s, the Assassination Records Review Board and the FBI designated some records as "not believed relevant" (NBR) or "not assassination related" (NAR). The FBI retained custody of the NBR/NAR records and postponed their transfer to NARA until a later date. Every document or group of documents ("serials"), however, received an indexed Record Identification Form (RIF) and FBI inventory sheet for insertion into the JFK Collection.

After an extensive search, neither the FBI nor the National Archives could locate a small number of NAR documents or case files.

This compilation represents NARA's efforts to reconstruct the original file or portions of the file, as completely as possible, with duplicate copies of documents located in the FBI field office and headquarters files within the JFK Collection. Each reconstructed file or compilation contains a Record Identification Form, an explanatory cover memo, existing administrative documents available within the JFK Collection, and copies of identified duplicate documents. The table below summarizes the status of FBI file MP 175-112, Serial 32.

RIF Number	FBI File Number	List of Serials From Inventory Sheet	List of Identified Serials at NARA	Reconstructed Status (None, Partial, Complete)
124-10241-10494	MP 175-112	32	0	None
